KEY SKILLS:

• Technical: Java, Spring Boot, microservices, Sql, kotline, Manual testing ,Jenkins,bitbucket,Kubernetes,Harness

Experience

01	**Type of Industry:**	**Capgemini India**
	Project:	Charter Communication
	Role/Title:	Senior Consultant
	Project Duration:	From Sep-22 to present
	Responsibilities:	

- Implemented Basic authentication for swagger ui

- Migrated services from vitual machines environment to kubernates platform which automates deployment,scale application efficiently
- I have handled and delivered 4 modules on-time(with team help) in the process of migrating VM based services to k8s.
- I have completed the project on-time and on-quality, exceeding the expectations of the client.
- Code changes and code reviews while migrating the microservices and taken ownership of 4 modules which likely means I am the responsible for their development, maintenance, and any related changes.
- Code changes & Code Reviews, delivery overseeing & ownership, Client presentations, automation improvements of k8s
- Automated almost 150 microservices using CI/CD pipeline, and deployed them in lower environment in MOBILE IT project in 2023
- Automated the deployment process of applications using CICD pipelines which reduces efforts of manual deployment
- Actively participated in L1 interviews to fulfilling project resources requirement.

Software /Languages: Java, Spring Boot, microservices, Sql, kotline, Manual testing ,Jenkins,bitbucket,Kubernetes,Harness
Tools: STS

02	Type of Industry:	**Zensar Technologies**
	Project Description:	Macy(Retail Project)
	Role/Title:	Technical Lead
	Project Duration:	From Aug-21 To May-22

	Responsibilities:	• Worked on APIs, Swagger implementaion
		• worked with upgrade and support activities
		• Worked on modules like login, advertisement
		• Worked on Docker, CICD pipeline , AWS, Sonarqube

	Software / Languages:	JAVA, Spring Boot
	Special Tools:	Sql Developer

03	**Type of Industry :**	**Silicon Asia Private limited**
	Project Description:	Internal Project and working on zee 5 app
	Role/Title:	Technical Consultant
	Project Duration:	From Sep-20 to july-21

	Responsibilities:	• Worked on APIs, Swagger implementaion
		• worked with upgrade and support activities
		• Worked on modules like login,profile,payment
		• Worked on Docker, CICD pipeline , AWS, Sonarqube
		• Analysis, Bug fixing, Unit testing, designing and development Project: SVC(kotline), Zee 5(kotline)
		• Participated in performance analysis, design, development and testing.
		•

	Software / Languages:	JAVA, Spring Boot
	Special Tools:	Sql Developer

04   **Type of Industry**   **Cognizent**

Project   Anthem(Hospitality)

Description: Testing the Website

Role/Title: Associate

Project Duration: From Mar-19 to Aug-20

Responsibilities:

- Executed logged defects and worked to resolve issues noted in testing process.
